First of all, when the user page is opened, the existing users are displayed.

previously registered users and their status

button to add a new user

There is also a checkbox to prevent users who no longer have access to appear.

Click the button to add a new user. Then the user is redirected to the add page.

In the next step after clicking the button, the adding user page opens.

To add a new user, the required information is entered in the boxes, the user is registered by selecting the role for the application and enabling it for the panel area.
